No Santa Claus Arrived For The Taxpayers

THE Dominion Government, in leasing that Calgary white elephant, the Southam Building, at \$70,000,000 a year for five years (with a renewable clause for another five years, making ten years in all) was certainly a generous Santa Claus to all the control of the

the Southams.

These multi-millionaires were not at all modest in their demands for \$700,000.00 rental for ten years, but must have had in mind, when making this deal, the success of the Edmonton Journal's monopolistic subscription rates. The Journal, no doubt in a spirit of public service, cut its rates more than half when the new Bulletin entered the field on December 3. This out represents saving of \$150,000.00 at year to the people?

But, Edmonton residents and Alberta farmers, read the following the subscription of the people of the peop

But, Edmonton residents and Alberta farmers, read the fol-lowing and learn a lesson in high finance:

The Southam building in Calgary was built in 1912, during the boom. The original building permit was for \$250,000.00, though this did not include the entire cost of the completed building. The land is assessed for ITS PULL VALUE. \$114,500.00. The completed building is assessed today for \$185,000.00, half the ways. The behaviour building is assessed today for \$185,000.00, half this value. The highest value that can be given the land and building is LESS than \$500,000.00.

Only the generous public works department of the Dominion Government at Ottawa ever would have stood for such a hold-up— the paying of \$700,000.00 (10 years' rent) for a building not worth \$500,000.00

the paying of \$700,000.00 (10 years' rent) for a building not worth \$500,000.00.

The Liberal party, responsible for this added burden on the tax-payers of Canada, deserves little sympathy for the treatment it received from his Southam Press in the last election—particularly from its western string of papers, the Winnipeg Tribune, the Calgar. The Journal especially showed its appreciation of the coverment's lawing emercially showed its appreciation of the government's lawing emercially showed its appreciation of the government's lawing generality by a most distartly attack on the Hos. Charles Stewart in publishing the notorious Scott charges on the eve of the election.

The remedy for this outrageous deal is the taking of immediate steps to cancel the lease of the Southam building and use the rental money as a sinking fund for the construction of a suitable public building in Calgary which the people of Canada will OWN at the end of ten years.

### Bubbles:

IT IS THE TASK OF EVERY MAN to provide a competence for himself and his family -- it is his dream to win financial independence.

It is upon this laudable ambition of man that the get-richquick schemer preys. Year after year he trades upon the small investor's inexperience. Wild are his claims -- alluring the promises he makes--tragic the disillusionment and loss.

Take no chances;

There is one form of investment which wide experience has proven safe -- which is guarded by every precaution which man can take -- and which affords not only a dividend on your investment, but absolute protection for your family in the event of your being taken from them.

For safety's sake -- invest in Life Insurance.
